Here are a few answers to commonly asked questions...

What is WK's Terrazzo composed of: white cement, marble aggregates and pigment. No resin is used.

It is heat, stain, scratch resistant: It is scratch resistant, and has above moderate heat resistance - the placement of extreme heat on the cool surface may result in thermal shock (the same as natural stone).

Colour variation / tolerance: There will be no colour variation from batch to batch. Accepted tolerance is up to 5%.

Is it UV stable: Yes - contains no resin.

Does it require sealing: Yes.

How is it fabricated? In the same way natural stone is fabricated.

Is it sustainable? Yes, only natural elements are used.

Applications: Any interior or exterior space - retail, commercial, residential.
